**Subject:** Water for Drilling Operations

Hi Doug, that should work. I am forwarding your suggestion to Doug Sutton. Thanks so much!  
C

**Subject:** RE: Important Notification of DS&G Sampling Results

Christina,

Is there any way that the drillers can fill up at Artesian's Red Lion Tank versus anywhere that is remotely close to the Llangollen/New Castle Area PFAS contamination?

The chances of BCEE and Dioxane being entrained in that tank right off of Rt 72 & Rt 1 should be very small at the least.
